## **DETAILED ACTION**

Acknowledgment is made of the receipt of the preliminary amendment received on 3/12/02. Claims 1-32 are currently pending.

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Mouse Pad Comprising A Card Read/Write Device.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1, 3, 6, 8, 11, 13, 18, 23, 24, 27, 28, and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Lester et al. (US 6,061,446).

Lester teaches a mousepad telephone 900 having a working area 902 configured to receive a mouse and serial interface 924 connected to a computer 950 having a known telephone card 951 (col. col. 5, line 58-col. 6, line 14).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 4, 5, 7, 9, 10, 12, 14-17, and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lester in view of Braun et al. (US 6,300,936) (hereinafter referred to as ‘Braun’). The teachings of Lester have been discussed above.

Lester lacks the teaching of the telephone card in a variety of different forms.

Braun teaches a computer 18 which implements processes using program instructions stored on a computer readable medium, such as a memory chip, hard disk, floppy disk, magnetic tape, CD-ROM, DVD, or PCMCIA card (col. 9, lines 43-47; col. 32, lines 54-65).

One of ordinary skill in the art would have readily recognized that making the telephone card as any one of a variety of storage medium would have been advantageous because the telephone card may have then been capable of being used on any of a variety computers that may feature only one of a particular type of storage medium reader/writer. Therefore it would have been obvious, at the time the invention was made, to modify the teachings of Lester with the aforementioned teachings of Braun.

Art Unit: 2876

6. Claims 25, 26, 29, 30, and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lester/Braun in view of House (US 4,799,054). The teachings of Lester/Braun have been discussed above.

Lester/Braun lack the teaching of text place on the exterior surface of the mouse pad.

House teaches a mouse pad having advertisement incorporated onto a mouse pad (col. 7, lines 42-47).

One of ordinary skill in the art would have readily recognized that the inclusion of visual information onto the mouse pad would have been advantageous since it would have immediately made the user aware of a product or to any particular pertinent data whenever the user looked in the direction of his hand. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Lester/Braun with the placement of the advertisement was taught by House.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

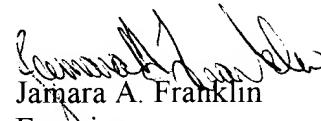

Shiobara et al. (US 6,304,248) teach a coordinate input device.
